WHAT IS SCALP MICROPIGMENTATION?

Scalp Micropigmentation (SMP) is an affordable, clinically proven, non-surgical procedure that replicates the look of natural hair follicles on the scalp. It can also be used to restore hairlines, cover scars and add density to thinning hair. Proving highly popular around the world as an immediate solution to hair loss, SMP produces the most realistic look of a stylish, closely buzzed hair cut as possible – regardless of skin type, the type or extent of hair loss, medical condition or presence of scarring.

An affordable, clinically proven, non-surgical procedure - and results can be seen after the first session!

HOW DOES IT WORK?

SMP works by using tiny needles to administer pigment into the scalp. The pigment is matched to the colour of your existing hair and your skin tone. Unlike a normal tattoo where the colour changes and the shape deteriorates, with SMP the colour remains in.

WHAT CAN SMP DO FOR ME?

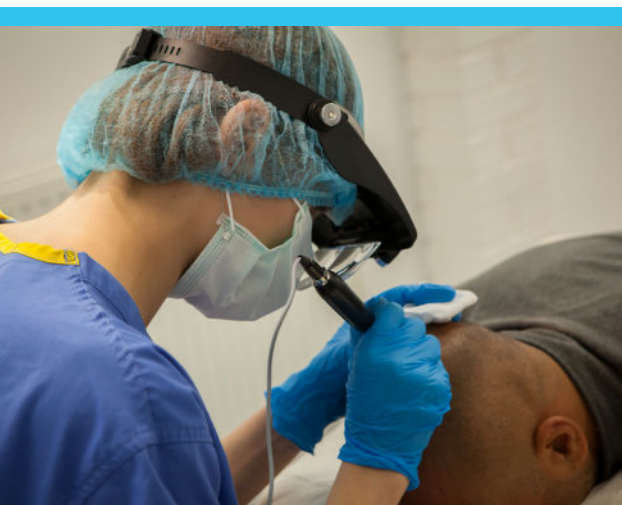

SMP is appropriate for all types and stages of hair loss, at any age, and on any skin. SMP can provide densification for those who have milder hair loss and can be used alongside hair transplants to give the desired look.

WHAT ELSE CAN SMP BE USED FOR?

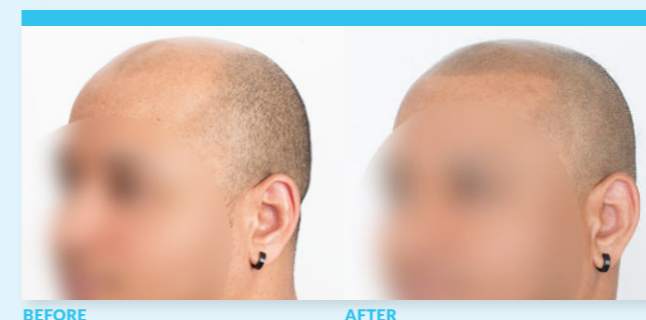

For anyone who has scars from a previous hair transplant, for example, SMP can provide a highly effective camouflage to conceal the worst elements of the scar. Also, for those with burns or birthmarks, it is a highly effective solution that can re-build your confidence and change your look.

WHEN WILL I SEE THE RESULTS?

Directly after the first session, you will see the design taking shape. After the second session, you will see that the final result is almost accomplished. It is very important to follow post-treatment care instructions and then after the 30-day touch-up, you will see the final result. Maintenance sessions may be required after 12 to 18 months.

OUR RESULTS

“Finally I have a hairline that frames my face, wish I hadn’t waited as long.”

DARREN (32), LEEDS

WHY CHOOSE SMP?

ONE

A permanent solution to hair loss.

TWO

Replicates the stylish and fashionable buzz cut look.

THREE

The Hair Dr is committed to providing a 5-star service in comfortable surroundings. Our specialists are recognised in their ability to create natural-looking results with a custom hair restoration plan based on each individual client’s needs.
